Create Image for Python App

SSH to your AWS Workstation

ssh devops@<public-ip-addr> of your Workstation

Password is: Dev0p\$!!/

Replace <your-name> with your name throughout the lab.

1. SSH to your AWS Workstation.

```
$ sudo su
```

2. Clone the Git Repo that contains the python code.

```
# cd /home/devops/Docker/
# git clone https://github.com/LovesCloud/python-docker.git
# cd python-docker/
```

3. Create Dockerfile in the /python-docker directory.

```
# vim Dockerfile
```

4. Paste the below script

```
FROM python:2.7-alpine
COPY ./requirements.txt /app/requirements.txt
WORKDIR /app
RUN pip install -r requirements.txt
COPY . /app

ENTRYPOINT [ "python" ]
CMD [ "app.py" ]
```

Save and exit by vim editor by pressing (:wq and press Enter)

5. Run the below command from python-docker/ directory

```
# docker build . -t docker-python-<your-name>
```

```
Collecting Flask (From = Frequirements txt (line 1))
Collecting Flask (From = Frequirements txt (line 1))
Collecting Merkeuges—0.14 (From Flask - Frequirements txt (line 1))

```

6. Once the build is successful run the below command to check the build details.

```
# docker images

root@ip-172-31-34-212:/home/devops/python-docker# docker images
REPOSITORY TAG IMAGE ID CREATED SIZE
docker-python latest c08094d820d6 45 seconds ago 75.1MB
```

7. Run your container

```
# docker run -d -p 80:4000 --name <your-name>-python-app

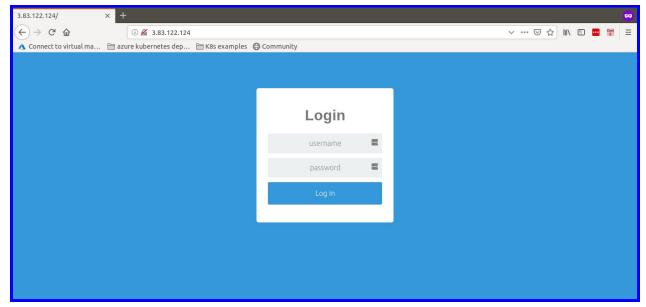

docker-python-<your-name>

# docker ps

root@tp-172-31-78-220:/home/devops/python-docker-mercedes# docker ps
CONTAINER ID IMAGE COMMAND COMMAND IMAGE Service Service Service Service Service Status Service Status Service Status Service Status Service Status Service Service Status Service Service Status Service Status Service Status Service Status Service Status Service Service Service Service Service Service Service Status Service S
```

The Python Docker Container running on port 80, and can be accessed from the public IP of the AWS Workstation on default Port 80

http://<public-ip-address-of-aws-workstation>

8. Login to the Application using the below credentials.

Username : admin
Password : password

STOP THE CONTAINER BEFORE PROCEEDING TO THE NEXT LAB

9. Stop the container by running the below command.

docker stop <your-name>-python-app
